

FRANKLIN ANTONY

Power BI Developer | Data & Analytics Specialist

+1 (331) 806-0466 | antonyfranklin029@gmail.com | [Linkedin:franklinantony29](https://www.linkedin.com/in/franklinantony29) | [Portfolio](#)

PROFESSIONAL SUMMARY

Power BI Developer and Data Analyst with 5+ years of hands-on experience building enterprise dashboards, data models, and automated reporting pipelines across the US and India. Microsoft PL-300 certified with an M.S. in Computer Science (GPA 3.78), consistently partnering with business leaders to translate complex data into strategic decision-making tools, delivering measurable impact:

- **DAX & Modeling** — Time Intelligence, YTD/MTD, Power Query (M), Star/Snowflake Schemas, Row-Level Security, and Azure-based architectures using Synapse Analytics and Data Factory
- **SQL & ETL** — Handles datasets exceeding 5 million rows, optimizes query performance, and automates data workflows reducing manual effort by up to 30%
- **Power Platform** — Canvas Power Apps, Power Automate cloud and desktop (RPA) flows connected to centralized SQL warehouses for end-to-end business process automation
- **Results** — 40% faster executive reporting, 50% reduction in manual processing, and 80% shorter financial reporting cycles

TECHNICAL SKILLS

BI & Visualization	Power BI Desktop, Power BI Service, Power BI Mobile, Paginated Reports (SSRS), KPI & Interactive Dashboards, Data Storytelling
AI & Advanced Analytics	AI Visuals, Natural Language Query (NLQ), Conversational Analytics, Anomaly Detection, Predictive Analytics, Narrative Insights.
Data Modeling	DAX (Time Intelligence, YTD/MTD), Power Query (M), Star/Snowflake Schemas, Tabular & Multidimensional Models
ETL & Data Prep	SSIS, Azure Data Factory, Power Query Dataflows, SQL-based transformations, Large Dataset Handling (5M+ rows)
Cloud & Databases	Azure Synapse Analytics, Azure Data Factory, Azure Cloud, SQL (T-SQL, MySQL, PostgreSQL), Stored Procedures, Query Optimization, MongoDB
Security, Governance & Responsible AI	Row-Level Security (RLS), Dynamic Security, Role-Based Access Control, Data Quality & Governance Standards, Data Access Controls, Responsible AI Guardrails, Explainability.
Power Platform	Power Apps (Canvas & Model-driven), Power Automate (Cloud & Desktop/RPA), Power Pages
Languages & Tools	Python (Pandas, Matplotlib), Git, Microsoft Excel (Pivot Tables, Power Pivot, VBA), Tableau, SAP

PROFESSIONAL EXPERIENCE

Power BI Developer (Contract) | Peak Stream Technologies — Edison, NJ | 02/2025 – Present

- **Partnered directly with business leaders** to define performance drivers and deliver enterprise-level Power BI dashboards for global sales and operations, processing datasets exceeding **5 million rows** with optimized refresh schedules.
- Engineered complex **DAX measures** (Time Intelligence, YTD/MTD) and calculated columns to track real-time KPIs, resulting in a **40% improvement in executive reporting efficiency**.
- Designed and implemented **Row-Level Security (RLS)** and Dynamic Security to ensure secure, role-based data access for 200+ global stakeholders across different regions.
- Designed automated workflows to establish **scalable self-service analytics**, enabling non-technical stakeholders to **proactively identify trends and operational risks**, improving data accuracy and reducing manual intervention by **30%**

BI & Power Platform Consultant | Lumina Tech Solutions | Chicago, IL | 02/2024 – 01/2025

- **App Modernization:** Developed a **Canvas Power App** for automated expense tracking and approvals, integrating it with **Power Automate** to reduce manual processing time by **50%**.
- **Cloud Integration:** Leveraged **Azure Synapse Analytics** and **Azure Data Factory** to ingest disparate data sources into a centralized SQL warehouse for Power BI consumption.
- **Automation:** Built **Power Automate Desktop (RPA)** flows to scrape legacy web portals for competitive pricing data, feeding directly into automated Power BI market-share reports.
- **Stakeholder Management:** Exercised **end-to-end ownership** of analytical requests from problem definition through delivery; **collaborated closely with governance teams** to ensure enterprise data standards.

JR Data Analyst | Global Tech Solutions - Hyderabad, India | 01/2021– 12/2023

- Developed end-to-end BI solutions from requirement gathering to deployment, focusing on analyzing customer behavior patterns and key retention metrics.
- Architected **Star Schema** data models and managed data migration using Excel templates and Dataflows, ensuring **100% data integrity** before deployment.
- Built and maintained interactive dashboards with advanced slicers and DAX-driven KPIs to support executive decision-making and strategic planning.
- Supported **UAT testing** and defect resolution within an **Agile/Scrum** delivery environment, contributing to significantly improved end-user satisfaction.

PROJECT EXPERIENCE

AI-Powered Job Matching System | Claude AI, Apify API, Python | Jan 2026 – Present

- Architected an automated data pipeline integrating the Apify API connector with Claude (Anthropic) to aggregate live job listings from multiple professional platforms at scale.
- Engineered structured AI prompts and vector **embeddings** to perform semantic matching between candidate profiles and unstructured job descriptions, prioritising transparency, **model evaluation**, and **responsible AI** validation techniques.
- Built an end-to-end automated workflow that reduced manual search-to-shortlist time by 80%, producing ranked, high-relevance role lists with direct application links.
- Demonstrates hands-on experience with AI/LLM integration, API connectivity, and intelligent automation — skills increasingly demanded in modern data and analytics roles.

Automated Financial Reporting System | SQL, Power BI, MySQL | 2024

- Built a MySQL database to consolidate multi-year financial data, enabling automated variance analysis and month-over-month trend reporting

- Engineered advanced SQL queries to automate monthly revenue reconciliation, reducing reporting lead time by 80%
- Designed interactive Power BI dashboards with drill-through capabilities to monitor budget vs. actual performance across business units
- Implemented scheduled data refreshes and automated alerting to proactively flag budget variances to stakeholders.

EDUCATION

M.S. Computer Science - Lewis University, Romeoville, IL Dec 2025 *GPA: 3.78 / 4.0*

B.E. Electronics & Communication Engineering - Vel Tech R&D Institute, Chennai, India May 2023 *GPA: 8.18 / 10*

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
- Microsoft Power BI Desktop for Business Intelligence — Udemy
